About the Workshop:

The implementation of evidence-based prevention curricula is an important part of a comprehensive approach to youth substance use prevention. Most of these curricula were designed to be facilitated in-person during school or in out-of-school time programs. The necessary shift to remote learning or a hybrid of in-person and remote learning has significantly impacted the delivery of these programs. This session will provide educators, counselors and prevention specialists with innovative ideas for effectively adapting prevention curricula in these challenging times.

Participants will learn about a variety of curricula adaptations to effectively engage students in remote learning while preserving fidelity and impact. Experienced prevention leaders will share their perspective on the needs of schools and youth at this time and discuss innovative ways to adapt and implement the follow curricula: 1) Too Good for Drugs, 2) Project SUCCESS Prevention Education Series, and 3) LifeSkills Training.

Educational Objectives:

1. Describe remote learning opportunities to implement evidence-based prevention.
2. Analyze whether modifications and adaptations of prevention curricula maintain fidelity.
3. Identify ways to adapt prevention curricula to respond to current educational needs.

Audience: Educators, Counselors and Prevention Specialists

Registration link above. Contact Rachel Witmer at rrwitmer@umkc.edu with questions.

Presenters:

Shelley Mann-Lev, MPH, ORN Prevention Consultant: Shelley Mann-Lev provides consultation on a youth substance use prevention and resiliency. She recently developed the *ORN Guide for Middle Schools on the Opioid Epidemic in the Age of COVID-19*. She is currently is the Co-President of the New Mexico Public Health Association and serves on the Board of Directors of La Family Medical Center.
